Laminating Equipment

Designed for Mounting and Laminating an average of 10 large prints a day. Pouch Systems feature pre-set controls for professional results with minimal training and start-up time. Pouch systems are ideal in an on-demand environment when fast turn-around of individual individual laminated prints are required. Can be used with Aqueous based inkjet and lithographic prints. Pouch systems are sheet fed and use pouches, pouch boards and individual laminating sheets.

Ademco Phoenix Heavy Duty Roll Laminator

LIST PRICE $2495

The Phoenix 44 Roll Laminator is robustly designed with larger diameter rolls to ensure a smoother finished product and a full working width of 44". It features two speed settings and two temperature settings allowing you to mount and laminate a wide range of materials, including heavier papers and films up to 10 mil thick. The Phoenix will accept boards up to a 1/4" thick.
A clear front panel/guard lets you see your work as it's being processed.
The Phoenix roll laminator uses films from 1.7 to 10 mils thick.
And with the easy webbing idler bar, film changeover is quick and reduces the film needed to thread the laminator. 3" core   Uses 110V. Stand – Optional
Using roll films can reduce your laminating costs by one third or more!

Stand   Item no. 632750-S

ProSeal 44 Laminator LIST PRICE $2495

The ProSeal uses standard 110V power, weighs 150 pounds and can sit on a table (optional stand available). The ProSeal can mount prints to graphic boards up to ¼" thick, laminate using pre-cut pouches up to 7 mil or mount and laminate prints simultaneously. Standard size materials pouches and boards up to 41"x61".
(Item #630710)

ProSeal 44 Kit (item #63071-KIT)

Pouch Mounting Laminating Cart

Designed to fit ProSeal and Ademco Laminators, this cart is made from heavy gauge steel and has locking caster wheels to store and roll into position.
Two storage shelves designed to hold pouch boards and film pouches.
and film pouches.

44" Cart measures 30"D x 60"W x 36"H
25" Cart measures 30"D x 45"W x 36"H

HOW TO PROCESS COLD POUCH BOARDS

1. Lift the lamiante and place the image on the board.
2. Hold film up or lay over top roller, process through the laminator.
3. Lift the laminated print, remove the release liner from the
   board to expose the adhesive.
4. Smooth the laminated print onto the board either through a laminator
   or by hand.
5. Attach display hardware and hang!

Cold Adhesives, Laminates
and Accessories

Adhesive Rolls

Both adhesives are self-wound with a single silicon release liner on a 3" core.
Indoor - A low tack adhesive good for most inkjet prints.
Outdoor - Outdoor adhesives designed for heavier papers and hard to stick board, such as
Gator or Sintra.
