### Flextex Plate Wipes

These time saving wipes are a welcome solution to the constant struggle to maintain a low lint environment. A heavy weight, extremely low lint wiping pad, encased in a nylon stocking, designed with our unique 100% felted Webril cotton fabric as the absorbent core. This non-scratch material will not damage photopolymer or rubber flexographic plates when used on the press for end of job cleanup or mid-run plate maintenance.

Fiberweb:**

## Why Flextex Plate Wipes are GOOD FOR YOUR SHOP:

- **Highly Absorbent**—Can absorb up to 10 times its weight in ink or cleaning fluids.
- **Time and Labor Saving**—No more spending time folding shop towels and cutting up stockings to stuff towels into them in hope of a more low lint environment.
- **Gentler on Equipment**—The non-scratch material prevents damage to plates.

### KleanWipes Digital Cleaning Wipes

Introducing a high-quality digital wipe designed specifically for digital applications—KleanWipes (DW) Digital Cleaning Wipes. With a low particle count for enhanced cleaning, these wipes are comprised of microdenier (extremely thin) fibers, and are ideal for use on sensitive surfaces throughout the shop. Economical KleanWipes DW are designed for all applications where dust control is critical (packaged in a class 10 environment). KleanWipes DW are soft, yet strong and absorbent, and non-scratching even on the most delicate coatings or surfaces. Low-lint KleanWipes DW help produce clean surfaces. You'll experience cleaner runs and enhanced equipment productivity.

## Veratec Graphic Arts Cheesecloth

Veratec Cheesecloth is an economical general wipe that's also perfect for specialized uses such as applying gum. Other materials often absorb too much, increasing the chance of oxidation, scratches, grease and dirt on plates. Veratec Cheesecloth is excellent for buffing plates to a dry, smooth, and streak free finish. It won't leave lint or any residue and can reduce scumming and half-tone plugging. Requires less water, particularly at start up.

Check out

Fiberweb:

## Why Veratec Cheesecloth is GOOD FOR YOUR SHOP:

- **No Guesswork**—Allows the proper amount of absorbency, so it won't absorb too much.
- **Multiple Uses**—Veratec Cheesecloth is excellent for buffing the plate to a dry, smooth and streak free finish. Leaves no lint or residue.
- **Better Desensitization**—Going directly to press or into storage, a properly desensitized plate will allow quick roll up and increased water receptivity to the non-image area.
- **Reduces Run Issues**—Reduced scumming, halftone plugging and requires less water, particularly at start up.

### Webril Pads and Wipes

Webril nonwoven material is a unique, high quality fabric made specifically for the Graphic Arts Industry. Our exclusive felting process produces 100% pure cotton products. Versatile Webril pads and wipes have been the industry standard for years.

**Webril Handi-Pads:** These 4 x 4 pads are a favorite in the industry. Perfect for small press and plate making operations.

**Webril Litho Pads:** These 4 x 8 pads on a perforated roll provide a smaller alternative to Webril Wipes. Convenient dispenser box allows for dust resistant storage.

**Webril Wipes:** These larger 8 x 8 wipes on perforated roll are just right for bigger jobs. The handy wall dispenser makes these popular wipes convenient without taking up scarce shelf or table space.

## Why Webril Pads and Wipes are GOOD FOR YOUR SHOP:

- **Multi-purpose**—A pad or wipe for every job application.
- **Convenient Storage**—Box dispensers save space, keep pads and wipes within arms reach, and help resist dust.
- **No chemicals or binders**—Will not react or contaminate developing solutions or chemicals.
- **Strong and Absorbent**—Soft, 100% pure cotton fibers will not come apart even when soaked in water or solvents.
- **Gentle on Equipment**—Non-scratch material is safe for even the most delicate coatings and surfaces.

### Web-Lock Graphic Arts Splicing Tapes

Web-Lock Splicing Tapes have been specifically designed to solve today's demanding adhesion problems. High technology adhesive systems are the critical component of all Web-Lock Tapes. Each tape has unique performance characteristics to meet specific requirements and have been tested on a wide range of substrates to ensure the proper degree of tack, adhesion and shear strength.

**Web-Lock TN-25 / TN-26 Transfer Tapes:** A special acrylic transfer adhesive provides instant grab with maximum shear strength. Web-Lock TN-25 and TN-26 have been routinely used on a wide range of substrates and proven reliable at high temperatures. A slight tinge of color in TN-25 let's you see where tape has been applied, allowing proper roll positioning.

**Web-Lock DN-31 / DN-32 Double Faced Tapes:** An exceptional acrylic adhesive with high tack and adhesion ensures superior performance with a broad range of difficult-to-splice materials. DN-31 is a bright red tape which is easily visible both before and after the splice is made. Excellent for newsprint and other porous substrates. DN-32 is resistant to high temperatures and can be used on porous substrates.

## Why Web-Lock Tapes are GOOD FOR YOUR SHOP:

- **High Technology Adhesive**—Specifically designed to tackle demanding adhesion problems.
- **High Performance Properties**—Tested on a wide range of substrates and at high temperatures.
- **Ease of Use**—Color coding makes tape easy to see, before and after the splice is made.
- **Options**—Available in transfer tape and double faced.

## Fiberweb products fit your prepress needs:

- **Lint-free**—Our soft, absorbent Snowtex, Nubtex and Photex wipes are lint-free and provide the assurance of a fresh towel each time. They're perfect for computer screens, glass and other optics that need to be spotless.
- **Highest quality**—With no chemicals or binders, our disposables like Snowtex cloth wipes or KleanWipes delicate/critical task wipes, are non-scratching and won't leave a residue.
- **Convenient**—Available in a variety of sizes and dispenser types, our wipes will fit any prepress operation.
- **Soft, yet strong**—Our wipes combine the characteristics of cloth towels with the ease and handiness of disposable wipes. Webril® wipes have inter-locking, 100% cotton fibers, so they won't come apart even if soaked with water or other solutions.
- **Anti-static properties**—Our Photex VIP, Photex anti-static scanner, and screen wipes were designed to reduce and eliminate static buildup and dust. Use them for cleaning a multitude of surfaces from computer screens to scanner drums. Then, admire the streak-free, scratch-free surface.
