OCÉ 4CFI PREMIÈRE COLLECTION

4 mil Optically Clear Polyester Film with Interleaf for the Océ ColorWave® 500/650/700 printers

Product Description

Océ 4CFI is a 4 mil optically clear polyester film with interleaf for CAD, GIS, and design applications. It is ideally suited for overlay applications for mapping, construction design and graphic design layouts. Océ 4CFI is for printing these types of applications on the Océ ColorWave 500/650/700 printers.

SPECIFICATIONS
Physical properties*

• Caliper: 4 mil
• Gloss: @60° - 130-155%
• Base: Optically clear polyester film
*Target Values

Features

• Optically clear for overlay applications
• Paper interleaf for visibility in printer
• Durable polyester base
• High quality colors
• Excellent Line definition

Recommended Storage Conditions and Shelf Life

• Temperature 60°-75° F. (15°-25° C).
• Relative Humidity printing range 35%
• Temperature 70° F.
• Shelf life-1 year with proper storage
• Repack open rolls when not in use
• Allow material to stabilize to room conditions 48 hours before use

Environmental, Health & Safety

• No Material Safety Data Sheet required.
• Waste not suited for recycling.

Main Applications

• Construction plan overlays
• Red line overlays
• Graphic Design layouts
• Mapping overlays

Printer/Ink Compatibility

Recommended for use in Océ ColorWave 500/650/700 series printing systems. On the Océ ColorWave 500/700 printing system you should choose the 4CFI 4 mil Clear Film profile. Remember to perform the media calibration function on the Océ the ColorWave 500 and 700 printers. On the Océ ColorWave 650 printer you need to download the Océ 4CFI OMP from the csa website.

Media Handling

To avoid smudges and marks on your finished print we recommend handling the coated surface while wearing cotton gloves. Store unused media in original packaging, vertically. For best results let media acclimate to printing room conditions for 48 hours before use.

Important

Printer and driver setting need set up to ensure the best performance. Appropriate ink loads must be set for the ink/printer combination being used.

Color Profiles

ICC color profiles will improve image quality and optimize ink limits for improved drytime, wider color gamut, and more accurate color matching. In the Océ ColorWave 500/650/700 series printers you can use the Océ 4CFI Profile.
