

Canson® Infinity Baryta Photographique II 310 gsm - Satin

The next generation of Baryta Photographique, offers photographers and printers the opportunity of creating a photograph with the true look and feel of a traditional darkroom print with improved handling and finishing characteristics.

Baryta Photographique II has a true 100% barium sulphate layer (baryta) which offers exceptional contrast and detail as well as a wide colour gamut. The product has an extremely high D-Max (black point) to produce black and white images with depth and clarity and colour images with vibrancy and intensity. The new generation product has a more structured surface aspect which is reminiscent of the traditional fibre-based darkroom papers and a fine satin finish.

With excellent handling characteristics, Baryta Photographique II can be used in a wide range of applications and is offered in sheets and rolls up to 60" wide.

References and size

For the Baryta Photographique II product

Weight (gsm)	310
Thickness (um)	305
Surface feel	Extra smooth
Surface finish	Satin
Composition	100% alpha-cellulose

Testimonials

For the Baryta Photographique II product

Robert Rodriguez JR

"The new Baryta Photographique II has the same beautiful qualities I've always loved about Baryta - silky smoothness, rich blacks, and wonderful color depth- and the new version improves on that in a subtle and nuanced way. If you loved the original Baryta, you'll love version II even more. And if you've never tried it, it's definitely worth consideration for those images where you want to make a powerful statement with a look reminiscent of a traditional dark room print. Version II is a step forward in every way for sure."
