

Tough Protection

for Vulnerable **Painted Areas**

Protection for Multiple Areas

3M™ Paint Protection Films protect paint and other vulnerable surfaces from stone chips, scratches, bug damage, road tar, fluid stains and punishing outdoor weathering. The film's flexibility makes parts easier to apply on complex automotive visible or non-visible surfaces, including:

- Leading hood edges
- Rocker panels
- Wheel flairs
- Door openings
- Metal separators
- Hose wraps
- Hole fillers

Key Benefits

3M™ Paint Protection Films offer many benefits for automotive manufacturers, ranging from extensive 3M research and development resources, worldwide design support, application engineering services to world-class manufacturing technology.

3M Paint Protection Films meet and exceed OEM appearance, performance and weathering requirements. Our films are available in a variety of thicknesses and stick to a multitude of substrates and surfaces, offering:

- Nearly invisible protection against scratches, part wear and corrosion, without detracting from the vehicle appearance like molded protectors.
- Absorption of stone impacts and resistance against scratching, staining and yellowing; protecting the integrity of the painted finish, while retaining the original film appearance for years on the vehicle.
- Film flexibility and die-cuttability, making parts easier to apply on complex automotive surfaces.
